# MOTRA

AUTONOMY, MAINTAINED

**$1.5M**

Seed Round — March 2026

## 📊 THE OPPORTUNITY

| 400K | $16B | $126B |
|---|---|---|
| RIDES/WEEK | WAYMO FUNDING | VALUATION |

Waymo targeting **1M rides/week by EOY 2026** across 20+ cities. Robotaxis run 15+ hrs/day — someone has to clean them.

## 🎯 THE PROBLEM

Waymo uses **1,000+ Transdev operators** at centralized depots. That doesn't scale to 20+ cities and millions of rides.

## 💡 THE SOLUTION

**MOTRA** = Gig-powered mobile fleet care. We dispatch techs TO vehicles (not depot-bound).

| SERVICE | PRICE | TIME |
|---|---|---|
| Quick Clean | **$12-18** | 5-10 min |
| Deep Clean | **$45-75** | 30-60 min |
| Emergency | **$75-150** | On-demand |

## 📈 MARKET SIZE

| YEAR | TAM | CAGR |
|---|---|---|
| 2025 | $2.7B | 99% |
| 2033 | **$147B** | |

Source: Grand View Research

## ⚔️ COMPETITIVE EDGE

| | |
|---|---|
| **Uber AV Services** | Competitor to Waymo |
| **Transdev** | Depot-bound, not mobile |
| **Tesla Robots** | Years away, Tesla-only |
| **MOTRA** | ✓ Neutral · Mobile · Focused |

## 🛡️ WHY WAYMO WON'T BUILD THIS

- **Already outsource:** Use 6+ contractors (Transdev, Moove, Avis, TechForce, Amerit, Terawatt)
- **Not core competency:** Every $ on cleaning = $ not on AI
- **Math doesn't work:** 20+ cities = thousands of employees. Gig = variable cost.

## 🏰 OUR MOAT

- **Network effects:** Hyperlocal gig network in each city
- **Data advantage:** Predictive maintenance from service data
- **Integration lock-in:** API embedded in fleet systems

## 👤 TEAM

**Adonis Williams — Founder & CEO**

Deputy Functional Chief Engineer, Boeing

15 Years Boeing | 2 Patents | MS Systems Eng.

MOTRA is a systems problem — coordinating distributed workforce for safety-critical AVs. That's what Adonis has done at Boeing for 15 years.

## 💰 THE ASK

**$1.5M**

SEED ROUND

| MILESTONE | TIMELINE | TARGET |
|---|---|---|
| First Contract | Month 6 | $10K MRR |
| PMF | Month 12 | $100K MRR |
| Series A Ready | Month 18 | $300K MRR |

**Use of Funds:** Product 40% | Ops 30% | Sales 20% | G&A 10%

## 🚀 EXIT STRATEGY

**Most Likely:** Acquisition (3-5 yrs, $100-500M)
**Acquirers:** Waymo, Uber, Amazon (Zoox)

> **Comparable:** Zoox acquired for $1.2B

Waymo valued at $126B — a $200M acquisition is a rounding error.

## 🛡️ RISK MITIGATION

Even if AV slows: **250K+ commercial EVs** need service (Amazon 30K→100K, FedEx 200K+, UPS 18K+)

Data: TechXplore, Fox News, Grand View Research, Transdev (Feb 2026)
